
Subject: Infant Food Packages – Non-Contract Infant Formulas

Effective Date: September 1, 2005

Revised from: October 1, 2004

Policy: Non-contract infant formulas may be issued when a licensed health care professional determines that the client has a medical condition that precludes the use of the contract formula. Medical conditions, which might indicate a need for a non-contract formula, include chronic diarrhea, persistent vomiting, persistent dermatological condition and persistent respiratory conditions. Five-day feeding trials for two separate primary contract infant formulas, which demonstrate formula tolerance problems, must be documented in the client's WIC record prior to issuing non-contract infant formula.

The Special Formula Issuance Form must be completed and kept on file for all non-contract infant formulas. A new request is required when the requested time frame expires or whenever the formula is changed to a special formula or another non-contract formula. It is not necessary to repeat documented formula trials for continued issuance.

The feeding trials may be omitted if the prescribing authority indicates that such trials are medically contraindicated or if it is in the infant's best interest to continue the non-contract formula, for example a fragile infant with documented medical situations, such as multiple GI surgeries or failure to thrive, that is finally stabilized on a non-contract formula.

Non-contract infant formulas are also allowed up to the infant's first birthday if it is documented in the WIC record that the infant requires the product in order to meet the families' religious eating pattern (note: All primary contract infant formulas are kosher). Neither the Special Formula Issuance form nor feeding trials are required.

Procedure:

1. Obtain a completed Special Formula Issuance Form from the health care professional.
 - a. A physician, or ARNP/RPA working under the supervision of a physician must sign the Special Formula Issuance Form.
 - b. The following items are required to be documented before a non-contract infant formula may be issued.
 - Formula (brand name of the formula requested)
 - Acceptable diagnoses – the medical reason that supports the issuance of a non-contract infant formula.
 - Daily amount required.
 - Length of time formula required
 - Health care professional's name and signature.

Subject: Infant Food Packages – Non-Contract Infant Formulas

- c. If the health care professional submits a referral form, note or hospital discharge sheet that includes all the required information, the CPA may complete the Special Formula Issuance Form based on the submitted information. The original information must be filed with the Special Formula Issuance Form.
 - d. Contact the health care professional if all required information is not submitted.
 - e. After ensuring all required information is documented, the CPA should complete the “WIC Office Use Only” section and sign the Special Formula Issuance Form.
2. The CPA will determine if the required feeding trials have occurred, based on the following guidelines.
 - a. Review the infant's feeding history with the caregiver. Document findings in the infant's KWIC record.
 - Was the infant breastfed? If so, for how long?
 - What infant formulas has the infant been on? How long did the infant try each infant formula?
 - What symptoms of formula tolerance problems were demonstrated for each infant formula tried?
 - Symptoms may vary, depending on the age of the infant, the amount of food ingested, and other medical problems. The symptoms may be related to the gastrointestinal tract or to the body as a whole.
 - Gastrointestinal symptoms include abdominal cramps (colic), vomiting, and/or diarrhea.
 - Generalized reactions include hives and swelling of the face, lips, throat, eyes and extremities; atopic eczema; asthma; nasal allergy (rhinitis); or systemic anaphylaxis (difficulty in breathing, hypotension, shock). These symptoms typically occur within two to four hours after the food is eaten, but the most severe reactions occur within minutes. Delayed reactions occurring several hours or days later have been reported, but they have rarely been verified in challenge tests.
 - b. If the infant's feeding history does not include any primary contract infant formulas, start 5-day trial of a contract infant formula.
 - If no tolerance problems are reported, issue the primary contract formula.

Subject: Infant Food Packages – Non-Contract Infant Formulas

- If tolerance problems are reported, the feeding trial should be stopped as soon as symptoms of intolerance are identified. Document how long the infant tried the primary contract formula and the exact symptoms of intolerance.
 - c. Start 5-day trial of an alternate contract formula.
 - If no tolerance problems reported issue the primary contract formula.
 - If tolerance problems are reported, the feeding trial should be stopped as soon as symptoms of intolerance are identified. Document how long the infant tried the primary contract formula and the exact symptoms of intolerance.
 - d. If caregiver refuses a trial of the primary contract formula, issue juice and cereal only.
3. Prescribe an age and situation appropriate food package containing the non-contract infant formula requested. (see Tables – Milk Based and Soy Based Non-Contract Infant Formulas).
- a. The caregiver may request either the powdered or the concentrated liquid form.
 - b. If ready-to-feed formula is requested, document the reason in the client's KWIC record. Contact the SA for requests that do not list one of the approved reasons for ready-to-feed formula. (see Policy: FCI 02.01.00 – Infant Food Packages).
 - c. If the information submitted by the health care professional is missing or not complete:
 - And the health care professional is available while the client is in the WIC clinic, one month's checks may be issued if the missing, required information is obtained by telephone and documented in the infant's WIC record.
 - And the health care profession cannot be contacted while the client is in the WIC clinic, one month's checks may be issued if the CPA documents why the request for non-contract infant formula is valid in the client's WIC record.
 - A completed Special Formula Issuance form must be on file at the WIC clinic before additional checks can be issued.
4. All unused WIC purchased formula and/or checks must be returned to the Local Agency prior to issuing a different formula food package. Formula must not be returned to stores.
- a. Follow the procedure for replacing formula or partial month's checks.
 - b. The CPA must change the food package.
 - c. See Policy FCI: 02.05.00-Documentation and Use of Returned Formula for instructions on handling returned formula.
